

# Table/Hand Fan

Building Guide

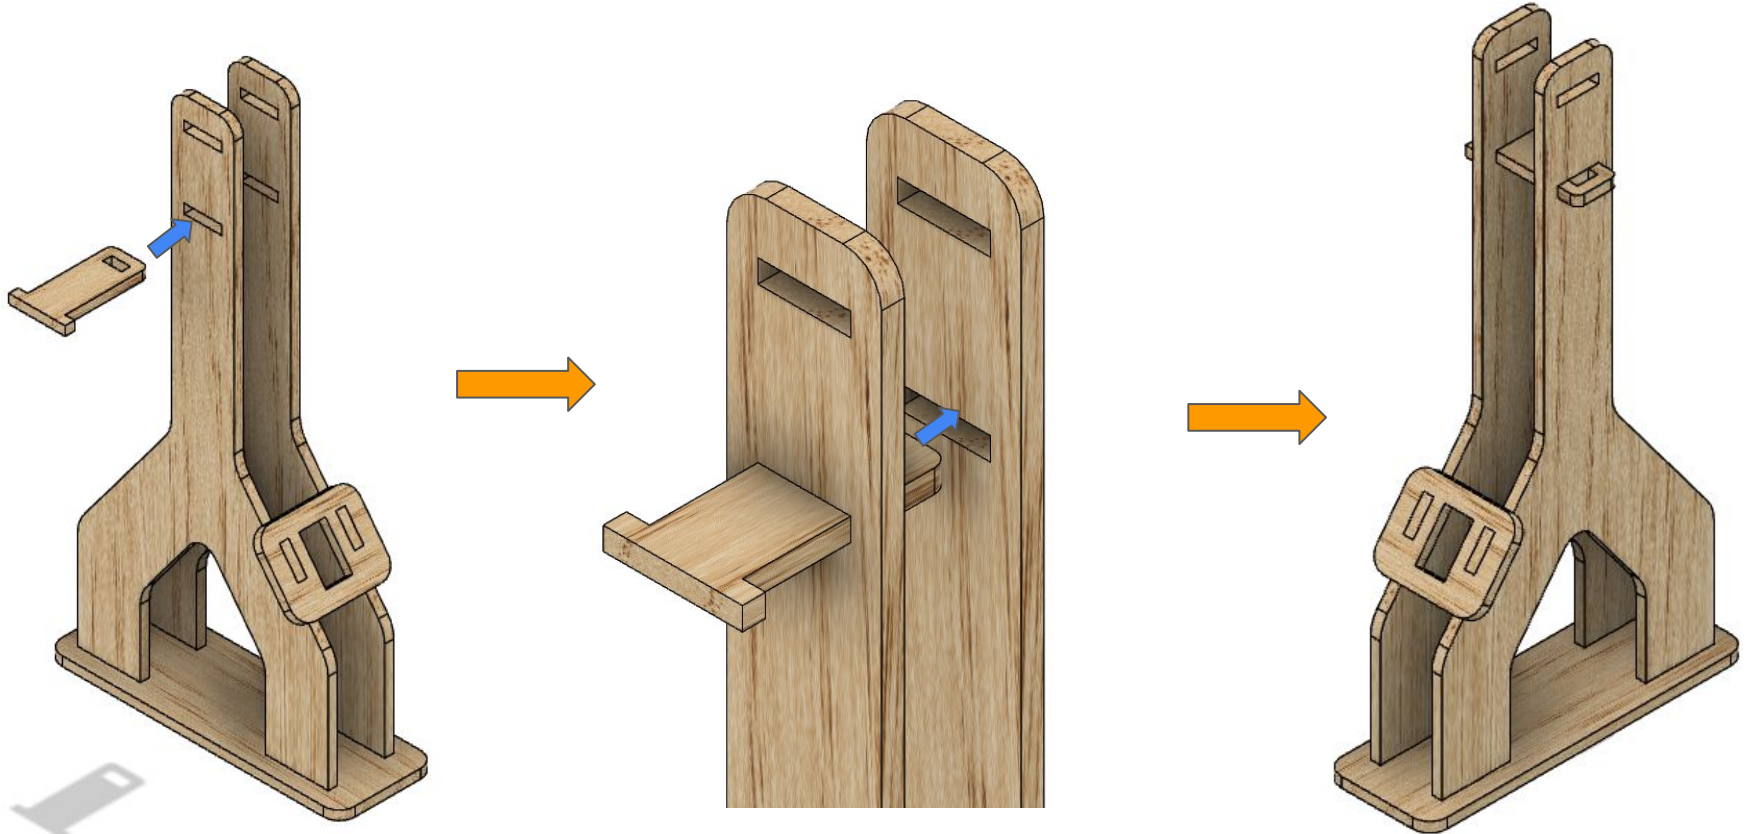

## Step 1: Attach both legs to the basement

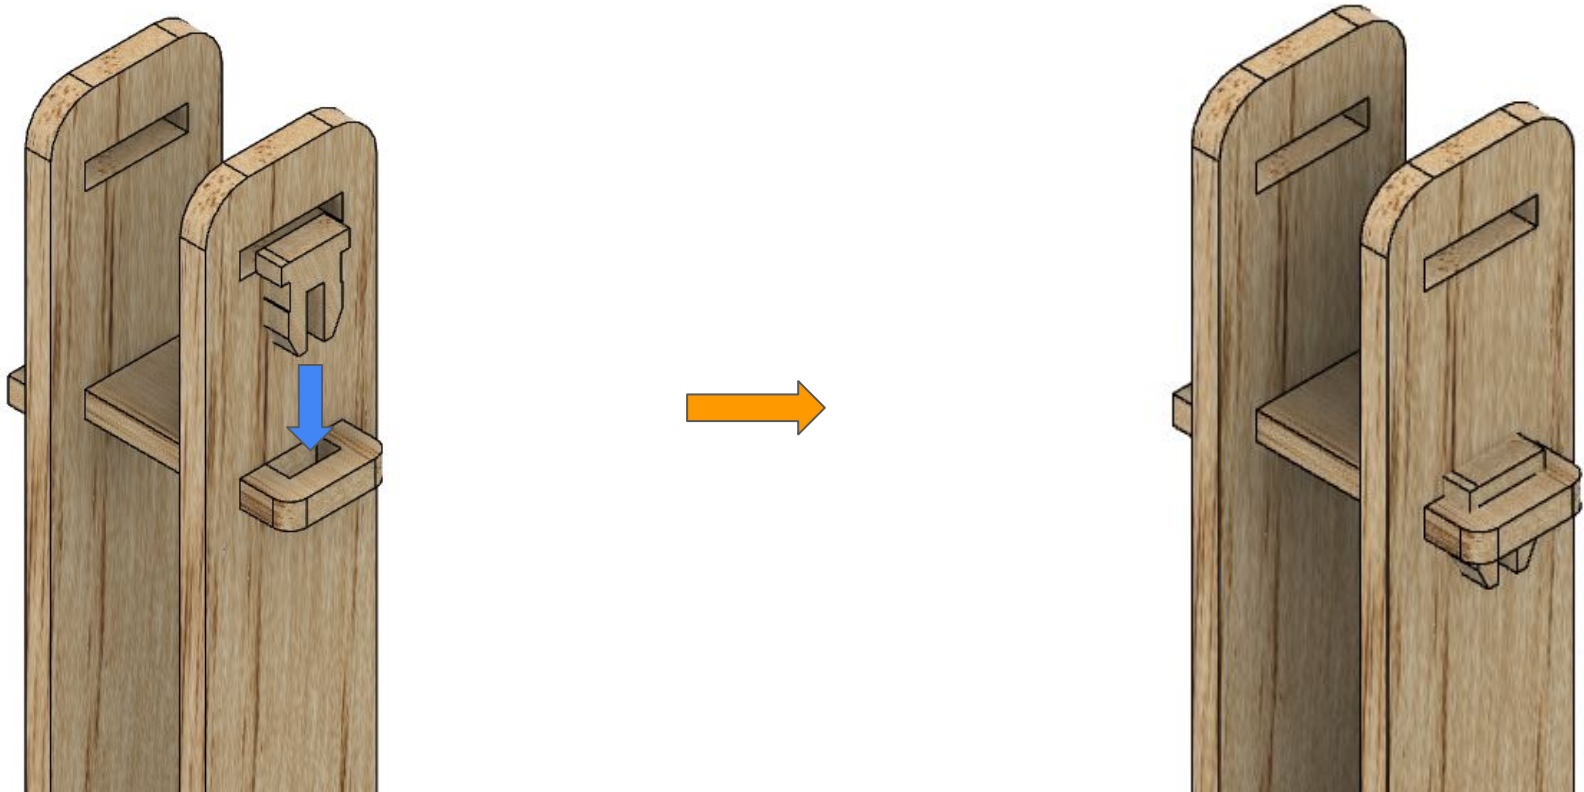

Step 2: Attach the switch port on the legs as shown

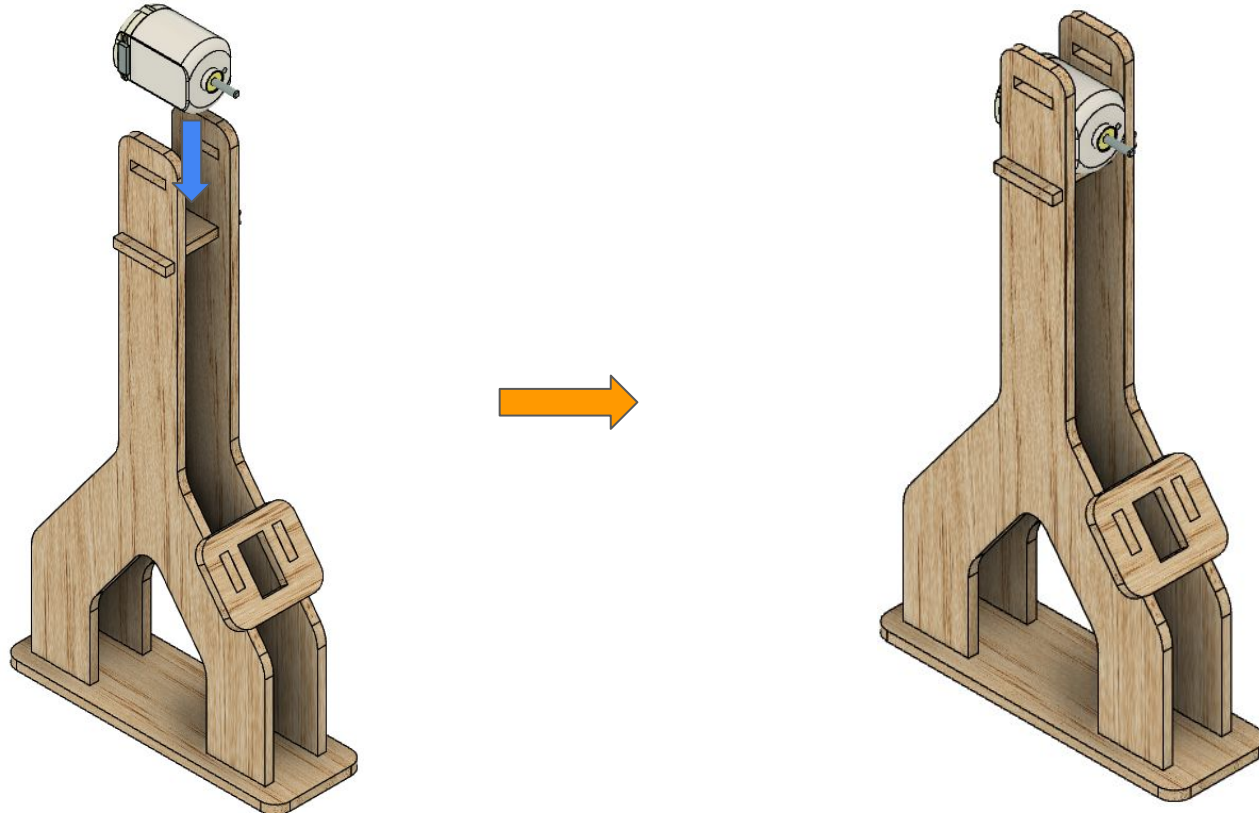

Step 3: Insert the mount through the bottom cut as shown

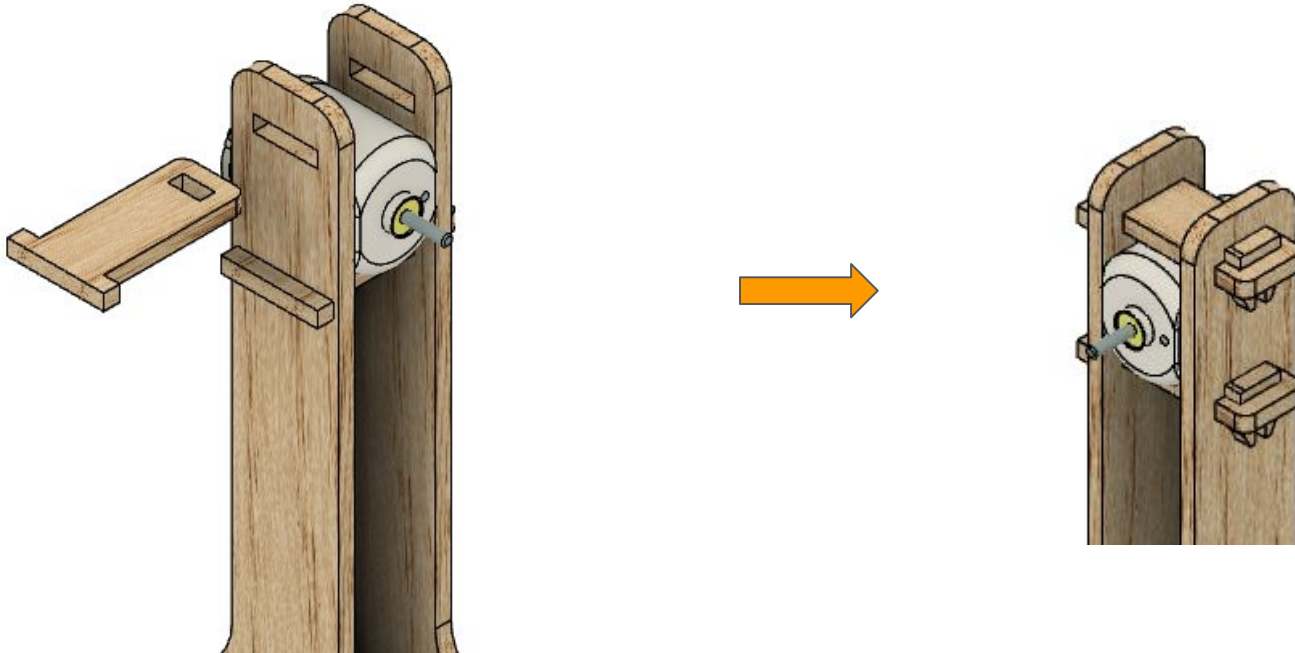

Step 4: Lock the mount on the other side as shown

Step 5: Insert the motor in the gap as shown below

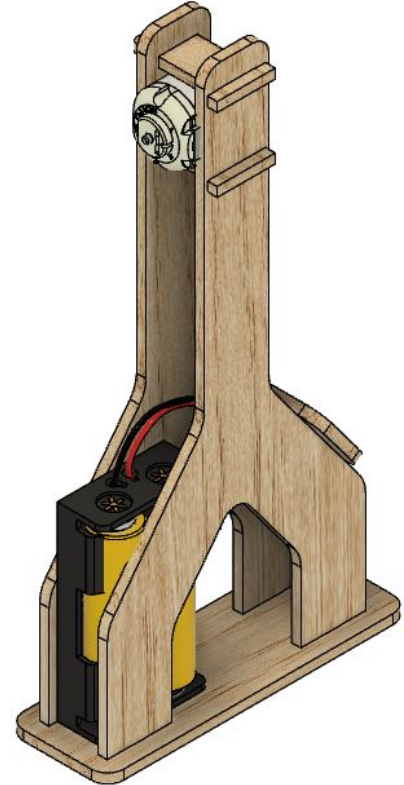

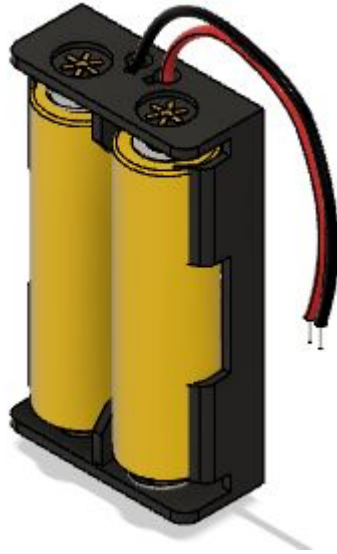

Step 6: Follow the step 3 and step 4 to insert the mount through the top cut and to lock it

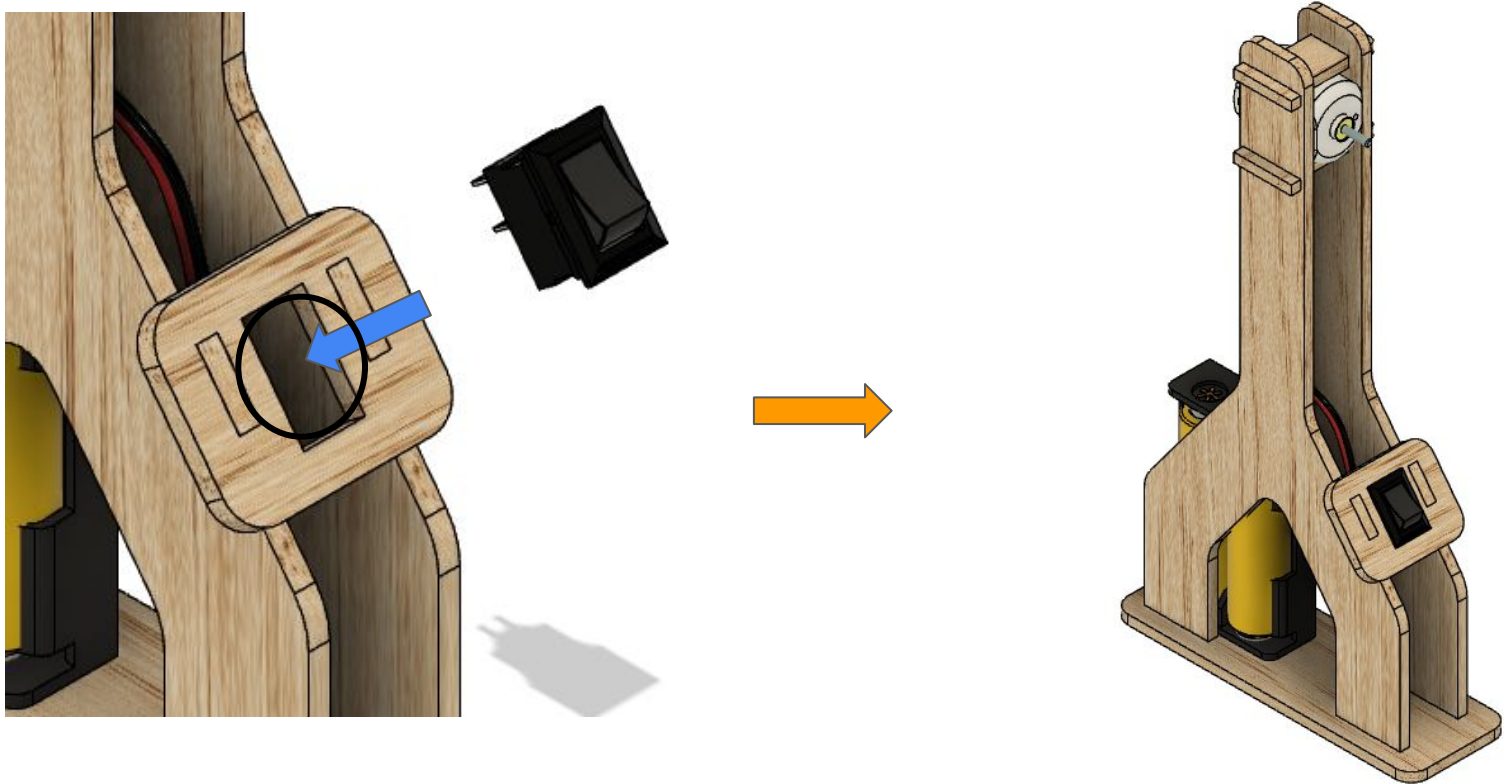

Step 7: Now, add the batteries to the battery pack and place it in the gap between legs as shown

Step 8: Now, take the wire clips through the hole and connect it to the switch, then insert the switch in to the hole

Step 9: Finally attach the given propeller to the motor, then switch on your fan and enjoy!
